

COVID-19 School Operations Plan

Cloverport Independent School District

February 22, 2022

Survey Analysis

A survey was conducted via Google Forms between February 18-22, 2022 regarding the revision of the district’s COVID-19 school operations plan. Below is a summary of the responses from 32 staff members, 68 students (6th through 12th grades), 42 parents, and 2 grandparents.

Which of the following best describes your beliefs on wearing face masks in school to reduce the spread of COVID-19?				
<i>Response</i>	<i>Students</i>	<i>Staff</i>	<i>Parents</i>	<i>Other</i>
Face masks should be required of everyone in the school building	21%	25%	19%	50%
Face masks should be optional for everyone in the school building	56%	31%	60%	50%
Face masks should be required of everyone in the school building only when community spread of COVID-19 is high	23%	44%	21%	0%

In total, 52% of respondents favor optional masking, 27% favor requiring masks only during periods of high community spread, and 21% favor requiring masks only when community spread is high.

Which of the following best describes your beliefs on physical distancing (i.e., 3 feet apart when masked, 6 feet apart when unmasked) in school to reduce the spread of COVID-19?				
<i>Response</i>	<i>Students</i>	<i>Staff</i>	<i>Parents</i>	<i>Other</i>
Physical distancing should be required whether or not masks are in use	15%	50%	12%	50%
Physical distancing should only be required when masks are not in use	46%	31%	33%	0%
Physical distancing should not be required in the school building	39%	19%	55%	50%

In total, 41% of respondents favor physical distancing only when masks are not required, 37% favor not using physical distancing at all, and 22% favor physical distancing regardless of masking requirements.

Which of the following best describes your beliefs on who should be required to quarantine when exposed to a positive COVID-19 case outside their household?				
<i>Response</i>	<i>Students</i>	<i>Staff</i>	<i>Parents</i>	<i>Other</i>
All direct contacts should be required to quarantine regardless of vaccination status	65%	56%	48%	50%
Only unvaccinated direct contacts should be required to quarantine	26%	28%	16%	0%
No direct contacts should be required to quarantine	9%	16%	36%	50%

In total, 57% of respondents favor quarantine of direct contacts regardless of vaccination status, 24% favor quarantine of only unvaccinated contacts, and 19% favor no quarantine at all.
